## Student Success Coaching Workshops

Do you work with students to help enhance their academic, personal, and professional success? Coaching is a communication style that can empower students to take control of their own success and be their own problem solver. Through active listening and open-ended questions, coaching aids students in building awareness, designing actions, and monitoring their progress towards holistic goals. This full day workshop begins with coaching fundamentals and ends with hands-on coaching practice—prepare to coach and be coached!
